

What's Inside:

- **Learning Opportunity** - Register for a [live AIA Approved webinar](#) with Technical Manager, Michelle Vondran.
- **The Green Book** - Your definitive resource for pre-painted and coated Steelscape metal products!
- **Why Quality Matters** - Confidence Inspiring Metal Tests We Perform So You Don't Have To Worry.
- **Color of the Month** - Engaging and dynamic "Legacy".

On April 15th, [Metal Architecture](#) and Steelscape's Technical Manager Michelle Vondran held a webinar "***Understanding Pre-Painted Metal***". Attendees gained an understanding of the fundamentals of pre-painted metal, common paint systems, their differences and suitability for different environments.

If you missed the previous webinar, join us for the next one on June 17th where we discuss "***Strategies for Success with Aluminum Zinc Coated Roofs***", where we get a comprehensive overview of design and installation considerations for painted and bare ZINCALUME® and Galvalume® products!

WHY QUALITY MATTERS

Confidence Inspiring Metal Tests We Perform

Learn the details of what guarantees a quality metal finish.

Metal is commonly known to offer longevity and durability when used for roofing or siding. Metal is also known to outlast other material types by two or three times. But did you know the stringent testing requirements it undertakes to ensure it will withstand the harshest conditions for years to come?

Learn what makes genuine Steelscape steel phenomenal, click the button below!
