

March 2021

2021 UPDATE - Compliance with Buy American Act, Surface Transportation Assistance Act & American Reinvestment and Recovery Act provisions

Steelscape manufactures its metallic-coated and pre-painted products in the United States from domestic and foreign sourced material. Historically, construction materials manufactured using Steelscape's standard material complied with the Buy American provisions of the Buy American Act ("BAA").

However, Federal Acquisition Regulation (FAR) rule changes outlined in Executive Order 13881 dated 25 January 2021, require that the domestic content of steel and iron products be 95% of total raw material costs. Steelscape's standard material does not comply with this modified requirement.

Domestically poured material that complies with Executive Order 13881 can be obtained upon request, subject to additional lead time. The requirement for domestically poured material must be identified at time of order entry. Please inquire for availability.

Similarly, Steelscape's standard material will not comply with the Surface Transportation Assistance Act ("STAA") of 1982 and the American Reinvestment and Recovery Act ("ARRA") as amended. Customers seeking to meet these requirements will also need to request domestically poured material at time of order entry.

The sourcing requirements for other local, state, or federal regulations can vary, and these requirements, including BAA, are subject to change. For assistance with sourcing provisions not outlined in this letter, or for guidance on changes to federal sourcing requirements, please contact your Sales Representative, or Steelscape directly at (888) 553-5521 or at productinfo@steelscape.com.

Thank you,

Michelle Vondran
Technical Manager
