

January 2022

Compliance with Domestic Steel Content Regulations, including Buy American Act

Steelscape LLC certifies that its products are manufactured in the United States and can comply with the Federal Acquisition Regulation (FAR) provisions applicable to government acquisitions governed by the Buy American Act of 1933, as amended on January 25, 2021 as well as other domestic content regulations.

The final FAR changes increase the domestic content requirements of most “domestic construction materials” and “domestic end products” from 50% to 95% as a percentage of total raw materials.

Steelscape can provide steel that complies with domestic content compliance regulations. However, we must be informed when requesting a quote or prior to order entry if the order must comply with any domestic content regulations, as additional lead times and costs may apply. Please specify that domestic steel is required and clearly indicate this on any quote requests or purchase orders.

For assistance with sourcing provisions not outlined in this letter, or for guidance on changes to federal sourcing requirements, please contact your Sales Representative, or Steelscape directly at (888) 553-5521 or at productinfo@steelscape.com.

Thank you,

Michelle Vondran
