

## What's Inside:

- [Matte Woodgrain](#) - Metal siding with an authentic wood finish.
- [Selecting Metal for Forest Environments](#) - Color considerations.
- [New AIA Course](#) - New accredited course now on [AEC Daily](#).
- [Project Spotlight](#) - Senior Center featuring ZINCALUME®
- [FREE Webinar](#) - Accredited 1-hr course on Understanding Pre-Painted Metal.

## Authentic Wood Finish For Metal Siding

Our Matte Woodgrain colors offer the warmth and natural beauty of wood combined with the durability of metal. Metal is fire-resistant, rot-resistant, termite resistant, and easier to maintain than wood. Explore these colors and request free color samples to see the authentic finish for yourself.

## Colors Ideal for Wooded Areas

Not all wooded environments are the same, and each project will have different metal roofing color considerations. Our unique color palette for metal roofing was developed based on feedback from customers and leading color experts. These carefully chosen colors help enhance the curb appeal of homes and other buildings in wooded areas.

## Beyond Ordinary: Contemporary Color & Finish Considerations for Metal Roofing & Siding

Metal roofing and single-skin siding are increasingly specified products of choice. This is due to the metal's longevity, durability, and visual appeal. This course reviews essential color considerations for metal roofing and siding, details on finish options, and emerging color trends.

## Landmark Square Senior Center

The latest addition to our Project Galley is this beautiful project in Fresno, CA. This 29,000-square-foot activity center built on a six-acre lot will provide seniors in the community with a central hub for transit and gatherings. To ensure long-lasting protection and performance, our 22ga [ZINCALUME®](#) coated metal was selected for the metal roofing finish. This aluminum-zinc coating offers two to four times the corrosion resistance of regular galvanized products.
