

What's Inside:

- [Natural Matte](#) - Ultra low-gloss metal roofing and siding colors.
- [2022 Residential Trends](#) - Influences in color and design.
- [Spruce Elementary](#) - A safe and inspiring haven for students.
- [Habitat for Humanity](#) - Women's Build 2022.
- [FREE Webinar](#) - Accredited 1-hr course on Understanding Pre-Painted Metal.

Natural Matte® VS. Standard Gloss

The image shows a close-up of metal siding panels. The left side is dark and matte, while the right side is lighter and highly reflective, showing a clear gloss.

Subtle. Refined. Revolutionary.

Natural Matte is a new range of six ultra-matte metal roofing and siding colors. Exclusive to Steelscape, this advanced paint technology [eliminates unwanted shine and glare](#), without compromising performance or durability.

Design and Color Trends

Ongoing changes in the way we work and what we value continue to push residential design in new directions. And not just new building design, these evolving trends impact the way homes are modified, remodeled, or simply redecorated. The 2022 Residential Design Trends cover a variety of topics for your home.

An Oxidized Look Without The Detractors

This memorable project features Steelscape's Burnt Rust finish, which provides a warm color to connect the building to the surrounding environment. Metal roofing and siding is perfect for educational buildings as it's low maintenance, durable and lasts a lifetime!

Women Build 2022

Supporting affordable and sustainable housing in our community, we are proud to have participated in this years' Habitat for Humanity Women Build 2022! In addition to donating the steel used for this home's roof, women from across Steelscape volunteered their time to assist with a new build for a deserving family.
