

PROJECT SPOTLIGHT:

FIRESTATION 63

TACOMA, WA

The expansive Central Pierce Fire and Rescue Station is designed to house one fire engine and one paramedic unit including crew living and support areas. Finishes were selected and designed based on sustainability, durability and integration into a broader mill concept. Steelscape's Burnt Rust print in a corrugated profile was selected to add a warm, contrasting hue to other metal wall products while also integrating with wood accents.

Architect: RiceFregusMiller and TCA Architecture Planning

Contractor: SCF General Contractors Inc.
