

PROJECT SPOTLIGHT:

SMOKEY'S LOST BAR AND GRILLE

DELHI, IA

Located on the banks of Lake Delhi in Eastern Iowa sits this charming bar and grille. Ideally situated just meters from the sandy shore, it's a welcome watering hole and eatery for those seeking to relax or unwind in the area.

Despite its small size, the design features a tough metal building. Metal buildings offer a cost-effective new construction solution and a large clear span interior area to give plenty of space for the bar, kitchen, and restaurant areas. Despite appearances, the outside siding is all metal, featuring Steelscape's Red Cedar finish to give the building warmth and distinct appeal.

Building Manufacturer: Hixwood Metals
