

Classic Brushed

Brushed metal is the perfect finish for contemporary exterior applications. Steelscape brushed series exudes the charm and depth of traditional brushed materials but without the added expense.

Brushed metal is designed to be restrained and complementary to the rest of the structure and be cohesive with other building materials. The Classic Brushed series offers this same visual restraint. Like other brushed materials, the metallic pigments and contrasting brushed accents add character and definition from certain viewing angles but blend to create solid metallic hues when viewed square on or out of sunlight.

Due to the delicate nature of this finish, it is best appreciated when applied as an exterior siding product such as concealed fastener wall products or vertical wall panels. This finish is ideal for modern building designs including building accents, wainscoting and entryways, or complete facades.

These designs employ the same metallic paint systems used for solid commercial and residential colors. This range of finishes incorporate cool, energy saving reflective pigments and carry extensive finish warranties of up to 30 years. For additional protection this series is available over ZINCALUME® steel which offers superior corrosion performance and a 25 and a half year corrosion warranty.

Representation of color may vary due to printing limitations. Actual metal samples are available upon request.

Due to the unique nature of this product, color may vary slightly from batch to batch. Batches should not be mixed on projects.
