

PROJECT SPOTLIGHT:

SKOKOMISH COMMUNITY CENTER

SKOKOMISH, WA

Designed to provide a safe and welcoming environment to the Twana community, this distinctive net-zero structure incorporates a gathering space, commercial kitchen, education space and a gymnasium. The vibrant Colonial Red roof and trim contrasts with the wood siding to provide a captivating, staunch structure that integrates with its surrounding wooded environment. The skillion style roof facilitates the extensive use of solar while also enabling the crisp, clean lines of the standing roof to be on prominent display.

Architect: 7 Directions

Builder: Pease Construction and Rognlins Inc.
