Steelscape's design and color solutions offer a captivating range of innovative metal finishes designed to transform buildings. Combining unparalleled color, depth, and distinctive light interaction, these colors expand the application of metal in modern building design. Ideal for metal roofing, siding, and other accent pieces, Steelscape's design and color solutions provide outstanding durability and robust product warranties.

Vintage

Vintage®

Vintage is an innovative prepainted metal product offering a warm, classic aged appearance. Steelscape's proprietary coating 'pre-ages' the TruZinc® steel, producing a beautiful yet durable finish. Vintage offers a 20-year limited finish warranty and graffiti resistance, making it ideal for both residential and commercial projects.

Vintage provides a highly versatile muted metallic hue for almost any metal roof or siding application. Suited for both exteriors and interiors, Vintage coated metal has become a top choice for building designers.

Legacy

Vintage® Heritage

Steelscape's Vintage continues to be used extensively in building design for its engaging luster and classic metallic look. Vintage Heritage expands upon this timeless aesthetic by adding additional depth and enhanced character in natural light conditions.

Designed to enhance immediate surface engagement while providing the same distinctive Vintage look from afar, Vintage Heritage is perfect for your next project. Available in two engaging, yet subtly different finishes, Vintage Heritage is designed to complement any metal roof and wall profile.

Carbon

Natural Matte[®] SMP

Subtle. Refined. Revolutionary.

With its unique microwrinkle technology, Natural Matte[®] SMP captures organic light interaction while delivering refined color. Exclusive to Steelscape, this advanced paint technology eliminates unwanted shine and glare. Designed for residential metal roofing, siding, or other exterior accent pieces.

Natural Matte® PVDF

The ultimate high-performance matte solution.

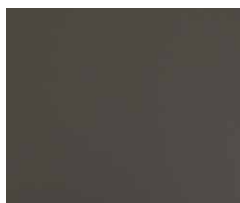

Natural Matte PVDF delivers outstanding color refinement without sacrificing performance or durability. It's low-gloss PVDF paint system offers superior finish performance and color stability. The refined, matte color palette makes it the ideal solution for elevating architectural and commercial designs.

Textured Rustics

Steelscape's Textured Rustics include Rustic Rawhide® and Sedona Rawhide™, two finishes that provide unmatched color experience with the engaging combination of color and texture. These textured finishes feature a multi-toned weathered metal design in conjunction with a wrinkled paint system for optimum authenticity.

Both designs interact dynamically with light to recreate the feel of traditional oxidized metal while minimizing surface sheen. The Steelscape Textured Rustics offer restrained colors that blend exceptionally well with a variety of architectural styles and material types.

These stunning finishes present all the beauty of weathered metal without compromising performance.

Weathered Zinc

Aged Metallics

Aged Metallics provides the charismatic appeal of weathered metal, including aged copper and zinc. The metallic pigments in these designs add authentic visual depth and distinctive color that evolves with the light of the day.

The dimensional finish adds depth and texture which improves the integration of the metal roofing and siding with other rustic materials such as distressed wood or aged stone. Despite an aged appearance, these finishes employ the latest in paint technology, offering limited finish warranties of up to 30 years.

Timeless Bronze

Classic Brushed

Brushed metal is the perfect solution for building siding or exterior accents. Steelscape's Classic Brushed series exudes the charm and depth of traditional brushed materials, without the added expense.

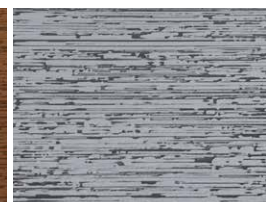

The metallic pigments and contrasting brushed accents add character and definition. The restrained design of the Classic Brushed print ensures a cohesive finish for all metal siding applications. With a limited finish warranty of up to 30 years, Classic Brushed offers both design flexibility and performance.

Sedona Rust

Burnt Rust

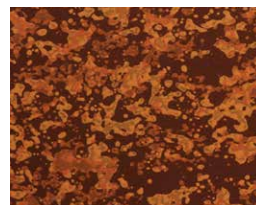

Rustic

Rusted metal exudes unique charm through its distinctive warmth and engaging texture. Rustic designs offer a broad palette of finishes by capturing the appeal without the detractors of unsightly rust stains and compromised performance. These designs carry finish warranties of up to 30 years, without the weight of weathered plate steel products.

From the bright oxidized glow of Sedona Rust to the duller aged hue of Natural Rust, Steelscape has an authentic solution for all metal roofing, siding, and interior accent applications.

Ash Gray

Hartford

Rawhide

Textured surfaces offer many benefits, including added depth and reduced sheen. Steelscape's Rawhide provides an appealing textured surface and a uniform, restrained hue. Despite its textured surface, Rawhide won't collect dirt or grow mold.

Rawhide improves integration with other materials with its duller, less reflective finish. This versatile product suits a broad range of applications including commercial siding, standing seam roofing, or corrugated panel wainscoting.

Black Cedar

Woodgrain

Woodgrain prints offer the warmth and natural beauty of wood combined with the durability of metal. Compared to wood, metal is fire-resistant, rot-resistant, termite-resistant, and will never need to be retreated or restained.

Featuring low-gloss colors with detailed grain patterns for optimum realism. Black Cedar features a patented textured pattern to evoke the unique charm of burnt wood. These colors are ideal for board and batten siding, wall accents, metal log cabins, and barndominiums.

ReziBond®

ReziBond

ReziBond is the ideal base material for gutters, downspouts, and other rainwater goods painted in the field. This innovative resin, applied over TruZinc® galvanized steel, offers a durable coating specifically designed to withstand the demands of product forming and field installation.

ReziBond offers superior paint adhesion, sealant compatibility, solderability, and improved lap seam adhesion strength. **Please note, ReziBond is designed to be field painted and is not recommended for exposed, exterior applications.**

Graffiti-Resistant Coating System

Steelscape's Graffiti-Resistant Coating provides an affordable solution for combating graffiti on new metal siding surfaces. This innovative system offers a factory-applied protective coating over painted Steelscape steel.

The coating provides a protective barrier and prevents graffiti from gripping or shadowing the surface. To remove graffiti from the coating, apply a separate third-party spray, and wipe away.

Custom Solutions

Make your metal roof or siding project stand out with a custom color or design. Thanks to our rapid prototyping capability and collaborative approach, Steelscape can develop and manufacture custom colors and designs on metal specific to customer requirements. Wherever your creative inspiration comes from, Steelscape can help achieve your design vision.

Innovators in Metal Coating

Steelscape is a leading manufacturer of painted metal for roof and siding products. Our long-standing industry relationships enable us to identify emerging trends in color and to develop innovative metal solutions for the design community. These metal solutions have elevated the curb-appeal of structures throughout the country.

With the unique ability to manufacture steel and apply high-quality paints in a singular facility, Steelscape guarantees unparalleled product quality and robust product warranties. Our products are the ideal material of choice for engaging structures that will last the test of time. We continue to strive to develop new products and evolve the options available for metal roofing and siding projects.

Product Specifications

	Characteristics	Substrate	Metallic Coating Weights	Grades	Thicknesses	Colors*	Finish Warranty
Vintage®	Aged metallic appearance with substrate showing through the coating.	TruZinc® Only	G90 Only	All within standard specification for G90 TruZinc®	0.0236"	One option available	20-Year film integrity & chalk Limited Warranty
Vintage® Heritage	Durable finish with a proprietary distinctive metallic luster using fluorocarbon pre-paint technology.	TruZinc®	G90 for TruZinc®	Grade 50CL1	0.0236" or 0.0296"	Two options available	20-Year film integrity & chalk Limited Warranty
Natural Matte®	Ultra-low gloss solid color family.	TruZinc® or ZINCALUME®	Standard Coating Weights	Standard Grades	Standard Thicknesses	Six options available	Natural Matte® SMP: 40-Year film integrity / 30-Year color change & chalk Limited Warranty Natural Matte® PVDF: 40-Year film integrity / 30-Year color change & chalk Limited Warranty. Coverage for extreme environments including industrial and severe marine environments.
Textured Rustics	Patented textured coating featuring a flexographic printed design.	TruZinc® or ZINCALUME®	G90 for TruZinc®; AZ50 for ZINCALUME®	Grade 50CL1	Standard Thicknesses	Two options available	40-Year film integrity / 20-Year chalk Limited Warranty
Aged Metallics	Tri-color layered flexographic printed pre-painted metal.	TruZinc® or ZINCALUME®	G90 for TruZinc®; AZ50 or higher for ZINCALUME®	Standard Grades	Standard Thicknesses	Multiple options, please inquire	30-Year film integrity & chalk Limited Warranty
