What is standing seam roofing?

Standing seam is a popular metal roofing product suitable for both residential and commercial applications. It also serves as an attractive and versatile siding solution. Standing seam offers superior performance, a clean appearance, and can be installed on most building types.

Standing Seam panels reflect one continuous panel piece from ridge to eave. Standing seam includes a broad range of products, designs, and attachment types, offering different visual appeal and performance.

The seam is the vertical rib of the panel that also locks the panels together. It is raised from the flat base (or pan) of the profile. Standing seam is a concealed fastened roof system as the attachment point to the building is concealed by the seam, providing superior weather tightness.

Learn more about standing seam roofing in [Steelscape's Metal Roof Buyer's Guide](#).

Does Steelscape produce standing seam roofing?

Steelscape does not manufacture roofing and siding panels. We produce the painted metal used for these products. Unlike other building products, metal is painted before forming, and it is in this process where metal gains its long-lasting durability and aesthetic appeal. Steelscape is highly experienced in the application of paint and color to metal, producing more than 400 million pounds of painted steel for metal roofing and siding each year. Steelscape translates this experience into a range of dynamic, contemporary metal roofing and siding colors that you can explore in our [product guide](#).

Contact Steelscape to find a manufacturer in your area who uses genuine Steelscape steel or inquire with your local metal roofing manufacture if they carry Steelscape products.

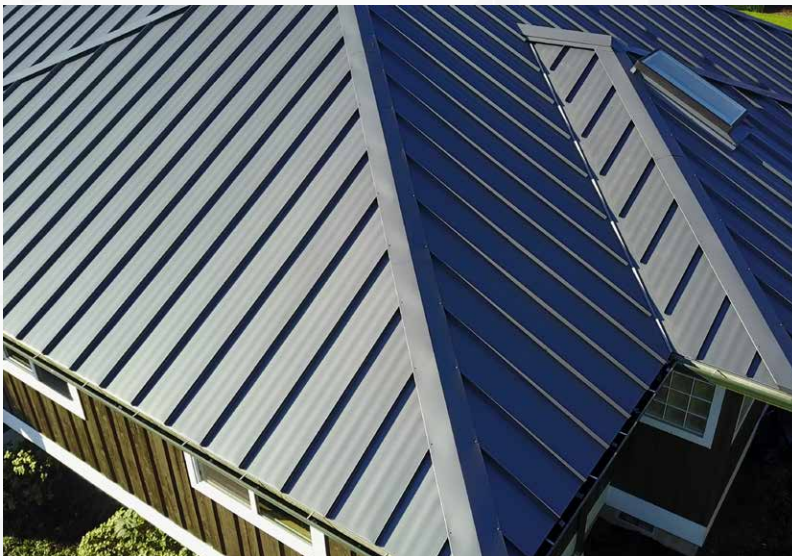

1

Kalama Home Reroof

Kalama, WA.

This revitalized home features a standing seam reroof with the Eternal Collection's Urban Slate color. This dynamic, restrained hue complements the home's lush environment and natural wood and stone siding. Compared to the old, tired teal colored roof, this new standing seam roof color completely modernizes the home.

Eternal Collection®
Urban Slate

Goodhaus

Navada City, CA.

Selected as Fine Homebuilding's House of 2018, standing seam siding and roofing is used in this design to achieve the vision of 'handmade modern' and to complement the extensive use of natural cedar siding. The distinctive shadows of the standing seam ribs combined with the classic color of Vintage® adds character and presence to the structure.

Vintage®

3

Aspen Reroof

Aspen, CO.

This homeowner selected Rustic Rawhide in a standing seam profile to provide a stunning yet robust fire-resistant system to replace old wood shingles. Rustic Rawhide in a standing seam profile offers a warm color and clean lines that complement the design features of the home. The added texture enhances the authenticity of the weathered metal color and reduces the shine of the large roof area.

Rustic Rawhide®

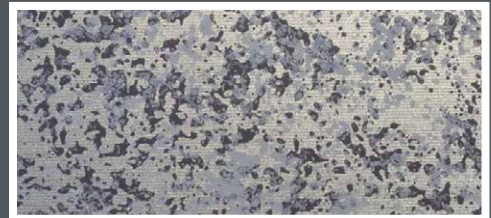

4

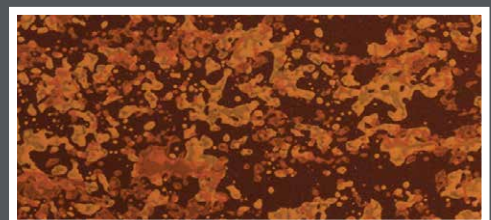

Interpretive Center

Kalama, WA.

This distinctive design recreates the charm of an old port warehouse by featuring standing seam roofing and siding. The metal colors combine warmth with notable appeal, while the ribs of the standing seam panels provide texture to the roofing and siding surfaces. Despite being all metal, the contrasting roof and siding finishes work together to create this striking waterfront building.

Weathered Zinc

Burnt Rust

5

Visitor Center

Moody, TX.

The standing seam roof and classic Vintage color work together to create a memorable welcome to Mother Neff State Park. Designed to match existing historic structures within the park, the clean lines of the standing seam roof complement the unique texture of the limestone façade and the broader sparse, southwestern setting.

Vintage®

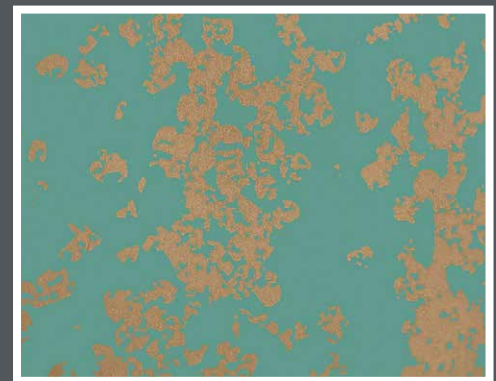

6

Performing Arts Center

Oceanside, CA.

Winner of the 2018 42nd Annual Orchids & Onions Architectural Award, the charming patina of Steelscape's Natural Antique Copper was chosen to provide a distinctive gleaming beacon for the school. The tiled standing seam panels provide a distinctive siding material that offers a unique look and low maintenance costs for school administrators.

Natural Antique Copper

Middle School

Reno, NV.

The standing seam siding in Steelscape's Sedona Rust color, provides a remarkable warm accent piece that integrates with the desert hues of this school's setting. The standing seam siding, which features panels of varying widths, provides varied texture to these accent pieces and capitalizes on dynamic shadows to further accentuate the siding color and contrast the sparse desert landscape.

Sedona Rust

Silo-Hanger Home

Alpine, WY.

While only a small accent piece of this large hangar-home, the standing seam 'silo' in Steelscape's Vintage color form the focal point of this design. The elegant color and sheen of the standing seam siding enhance the visual appeal of this home while still suiting its mountainous setting.

Vintage®

9

Custom Home

Casper, WY.

This custom antique bronze color adds warmth and charm to this inviting home and contrasts the natural wood siding and sun-drenched hues of the surrounding grasslands. The clean lines of the standing seam profile work in unison with the wooden board and batten siding to provide an unforgettable home design.

Custom Finish

10

Coyote House

This homeowner selected a classic standing seam roof to complement their log home. The simple lines of the standing seam roof, classic green color, and existing log design work together to create a welcoming home. The textured finish of this color adds additional sensory appeal while reducing glare.
